**Subject:** RE: NJ legacy PFCAs in soils draft for review

Hey Andy,

**Ex. 5 Deliberative Process (DP)**

# Ex. 5 Deliberative Process (DP)

I'd be pleased to present to our group sometime. Always good to have more eyes on data.

I am taking off for the rest of the week after today, so I hope you have a great weekend.

John

John,

Awesome work!

**Ex. 5 Deliberative Process (DP)**

Have you done any correlation analyses yet? Wind vector modeling? Now that you have the data lots of interesting stuff is possible.

Would you be willing to present these data to the EPA group so we can gain an understanding of what you've got and maybe as a practice for presenting to NJDEP?

Great work – Thank you.

Andy

**Subject:** NJ legacy PFCAs in soils draft for review

Tom, Brittany and Tim,

For your review, please find attached analytical data for PFCAs in the soil samples that New Jersey personnel collected. In the "Summary" spreadsheet, the draft data are summarized and reported with QA checks. In the "Legacy" spreadsheet, all calculations used to generate the final draft values are shown. Quality of the results look generally very good; mean sample recovery was 99%.

## **Ex. 5 Deliberative Process (DP)**

Tom and Brittany can coordinate on whether they review sequentially or simultaneously.

Have a great holiday weekend everyone.

Thanks,  
John
